

STEPS TO OPEN THE PROJECT THROUGH THE DRIVE

Download the main folder inside the folder 🖱️

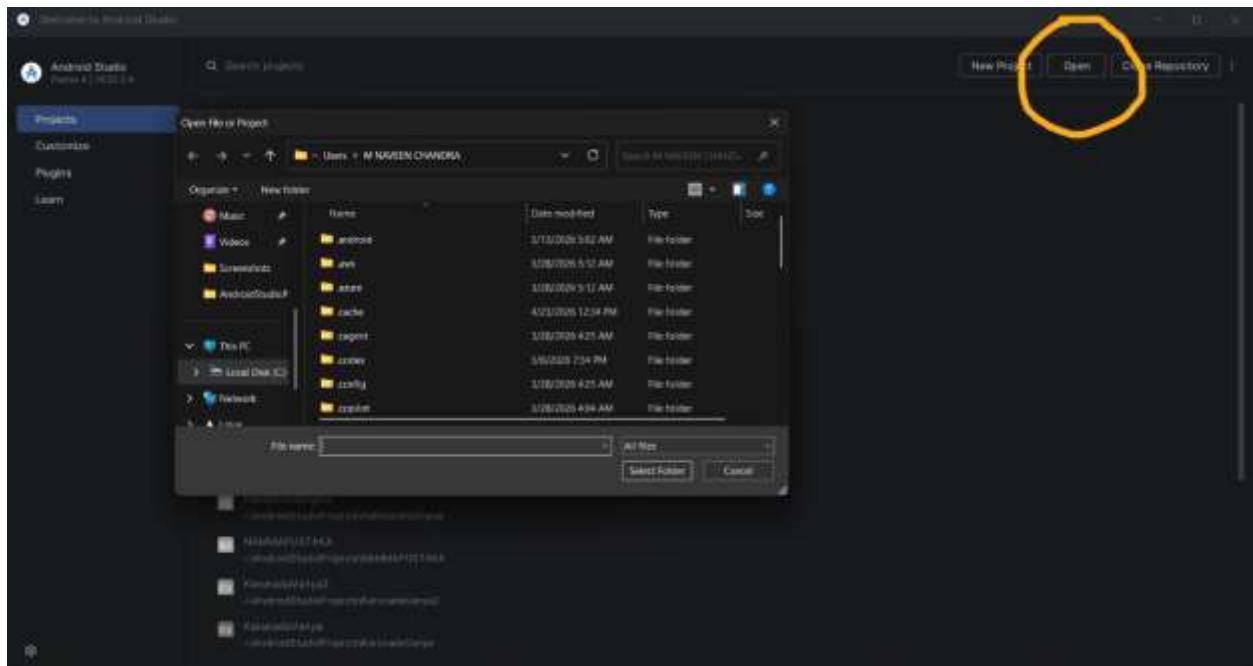

You can see the downloaded zip file in this way on your downloads 🖱️

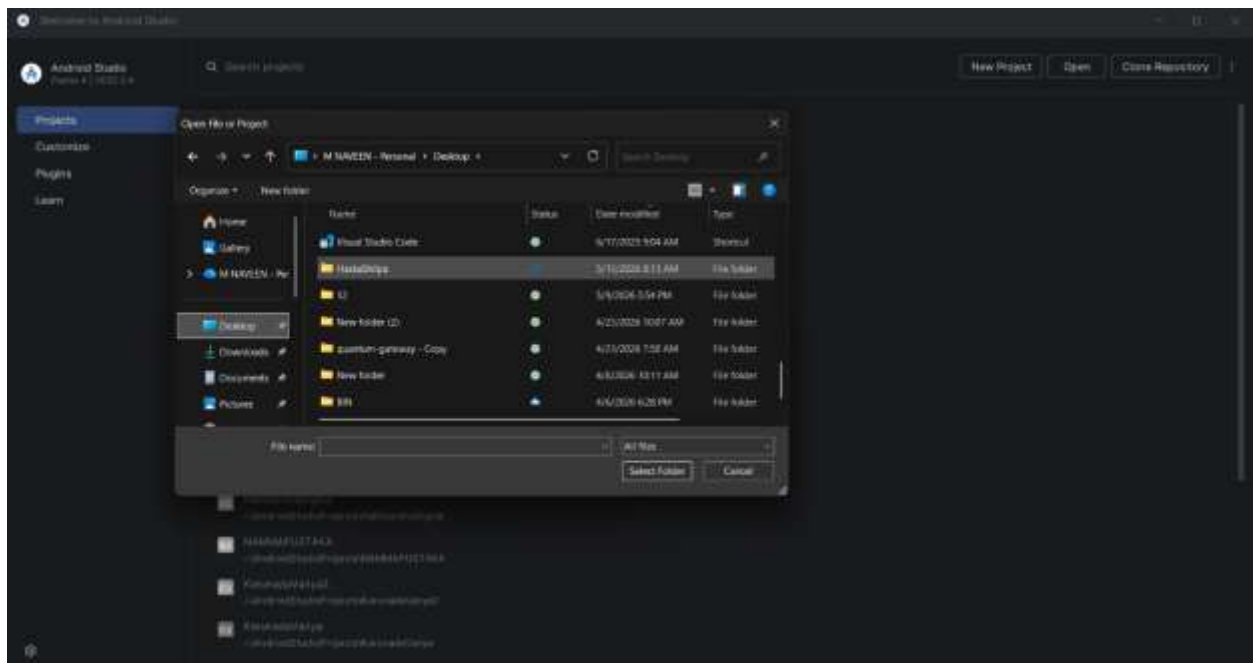

Open Android App studio

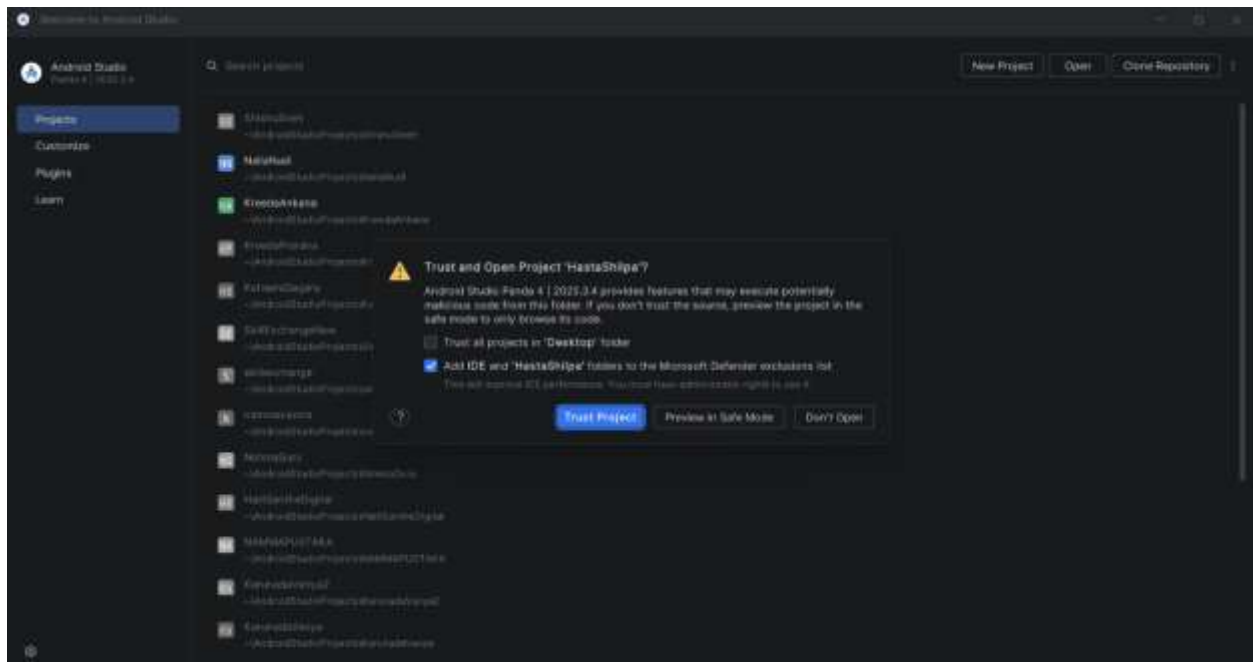

And click on OPEN & this window pops up 🖱️

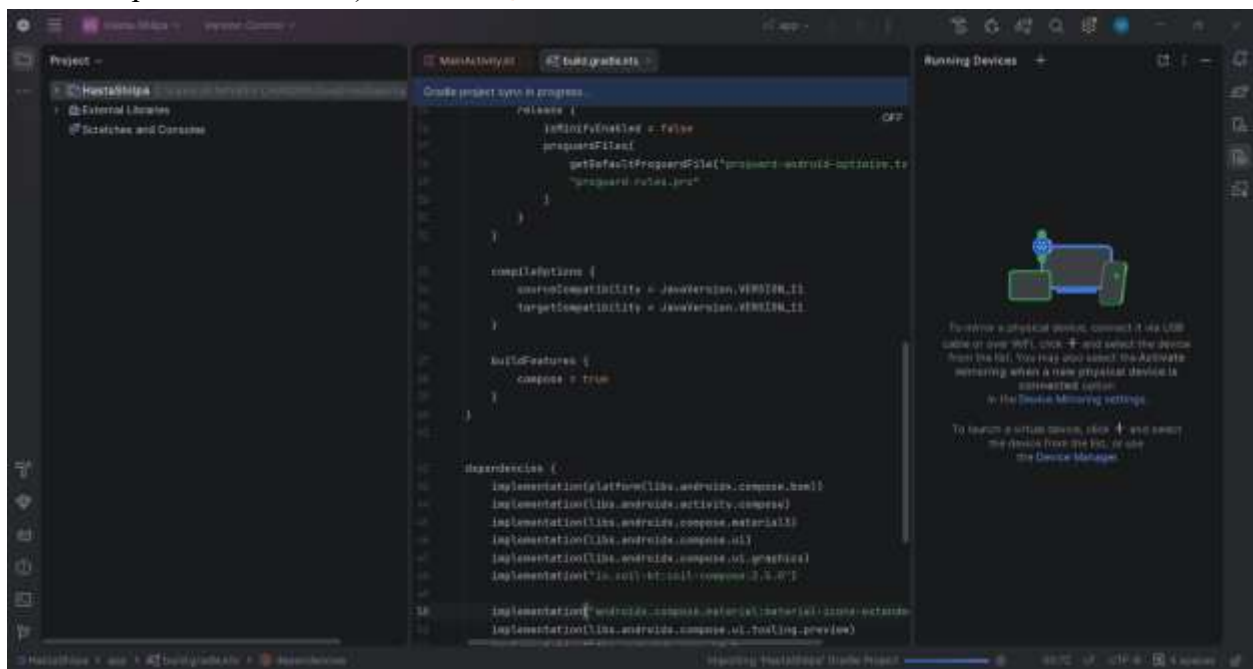

If the folder isn't available in the downloads section / Is your folder still a zip file then copy the main folder and paste it somewhere on the desktop 🖱️

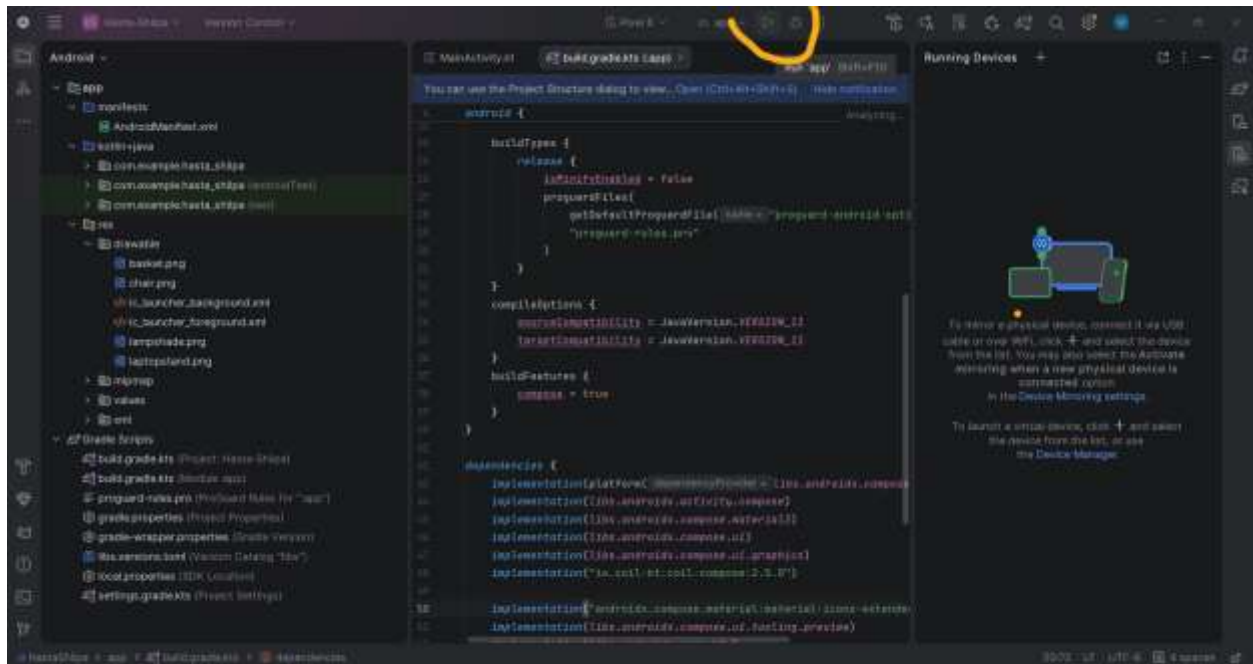

Click on the project folder and this window pops up & click on TRUST PROJECT 🖱️

This window pops up and wait till the gradle finishes (Usually take upto 3-5 min based on network speed and file size) the build 🖱️

Later once the gradle building is finished this RUN button on the top will be activated and click on it 🐾

Once the installation is done the emulator window pops up with the respected project 🐾
